Avoid close or long term contact with the skin.

Storing food in the working area is prohibited.

Do not inhale gases / fumes / aerosols.

Take note of assigned Workplace Exposure Limits.

· **Respiratory protection:**

Use suitable respiratory protective device in case of insufficient ventilation.

Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

If respiratory protection is required, institute a complete respiratory protection program including selection, fit testing, training, maintenance and inspection.

· **Protection of hands:**

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· **Material of gloves**

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Hand protection:

Full contact:

glove material: Nitrile rubber

glove thickness: 0,11 mm

break through time: > 480 min

Splash contact:

glove material: Nitrile rubber

glove thickness: 1,11 mm

break through time: > 480 min

The protective gloves to be used must comply with the specifications of EC Directive 89/686/EEC and the resultant standard EN 374, e.g. KCL 741 Dermatril (R) L (full contact), KCL 741 Dermatril (R) L (splash contact).

· **Penetration time of glove material**

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· **Eye protection:**

Safety glasses

Goggles recommended during refilling

· **Body protection:**

Protective work clothing

Body protection must be chosen depending on product properties, activity and possible exposure.
