

## TECHNICAL DATA SHEET

### ATF Dexron IID

Automatic Transmission Fluid

#### Product Description:

ATF IID is a high quality, high performance automatic transmission fluid containing viscosity improvers, anti-wear and anti-foam additives, friction modifiers and anti-oxidants for long life stability.

It is designed for use in most automatic transmissions fitted to trucks, buses, off-highway and construction equipment, light commercial vehicles and passenger cars.

#### Advantages/Benefits:

- Excellent thermal stability
- Exceptional shear resistance
- OEM approved performance profile
- Exceeds GM Dexron II performance profile
- Improved mechanical component protection
- Dyed red for identification purposes.

#### Application:

ATF IID is designed for use in automatic transmissions manufactured by General Motors, Vauxhall and Opel. It may also be used in Ford vehicles having red dipsticks.

ATF IID can also be used as a power steering fluid/hydraulic oil in appropriate vehicles.
