

GEM LHM FLUID

TECHNICAL DATA SHEET

Description

Gem LHM Fluid is a mineral oil blended with Polyacrylate and combining anti-oxidants. Gem LHM Fluid is especially formulated for use in Braking and Central Hydraulic Systems.

Applications

Gem LHM Fluid is used in Central Hydraulic and Braking Systems of motor vehicles requiring a mineral oil (e.g. Citroen).

Typical Inspections

Inspection	Unit	Result
Viscosity @ 100°C	mm ² /sec	3.6
Viscosity @ 40°C	mm ² /sec	14
Viscosity Index		135
Flash Point, Open Cup	°C	
Pour Point	°C	
Density @ 15.6°C	kg/l	0.890
